SECTOR

VARIABLE SPEED, WIRELESS SAFETY, EMERGENCY EGRESS.

Variable Speed Drive

Provides for smooth operation and longevity of drive components. Opening speed up to 50 inches per second. No brake adjustments required.

Self Supporting Side Frame

Includes full roll and motor covers. High luster galvanized finish resists corrosion and is long lasting. Compact design fits into tight spaces. Sizes up to 16 x 16.

Breakaway Bottom Beam

Easily resets without any tools or opening of the side columns.

Control Panel

UL, CSA and NEMA 4 in the USA and Canada. Electronic inverter/frequency drive with self test function. Open/partial, open/close push buttons and Estop are standard. Input voltage can easily be changed in the field. Single phase 230 Volt available without up charge.

Door Panel

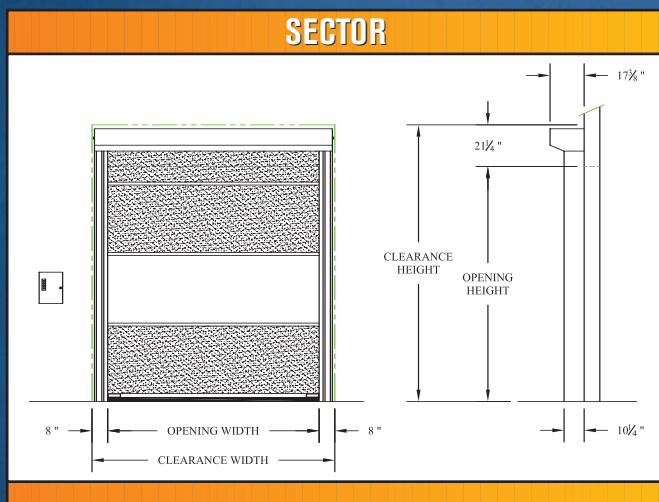

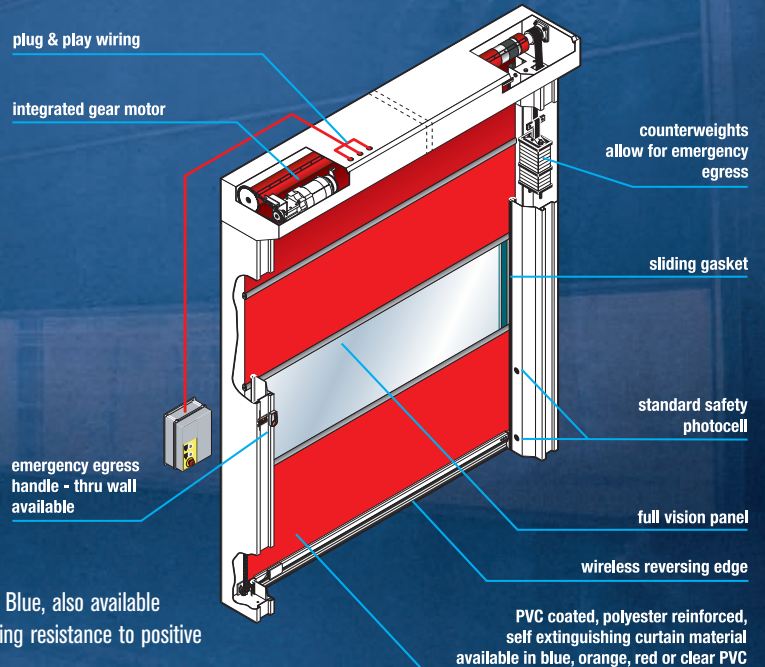

PVC coated, polyester reinforced, self extinguishing curtain material (Red, Orange or Blue, also available in clear PVC). Modular design connects curtain and vision panels to wind ribs providing resistance to positive and negative pressures (has slide in, slide out panels).

Safety Systems

Wireless, failsafe self monitoring reversing edge and two fixed photocells are standard.

Emergency Egress

User friendly egress system requires a "flip of the handle" on the side frame to open any door in the closed position in the event of a power outage. Thru wall option also available.

Opening speed	Up to 50 ips
Maximum size:	16' x 16'
Max wind resistance	Up to 55/MPH
Type of balancing	Modular counterweights
Type of curtain	PVC coated polyester fabric and transparent PVC panels, inserted into aluminium extrusions
Self-extinguishing class	PVC coated polyester fabric = class 2 transparent PVC = DIN 4102
Reversing edge	Wireless, Failsafe (highly sensitive self-monitoring edge)
Control panel	Electronic inverter control/frequency drive (UL, CSA and NEMA 4 in the USA and Canada)
Activation	Motion Sensors, Floor Loops, Pull Cords, Radio Controls or any device that sends an electrical signal
Curtain colors	Red, orange, blue and clear PVC
Warranty	Two year unlimited cycle warranty on all mechanical and electrical components
